NIPPON THOMPSON CO., LTD.

Temporary Suspension (Access Restrictions) of Certain Content Due to PHP Vulnerability Mitigation Measures

As reported in various media outlets, a serious vulnerability has been identified in the programming language “PHP.” It has been pointed out that this vulnerability poses a risk of data theft, website tampering, and system takeover due to the execution of malicious code from external sources. Furthermore, the Information-technology Promotion Agency (IPA) and other cybersecurity authorities have issued warnings and recommendations advising that, if a patch cannot be applied immediately, organizations should consider taking affected websites offline.

From the perspective of ensuring security and protecting information assets, our company will also perform emergency maintenance on the web servers and related systems under our management.

Consequently, we will temporarily suspend or restrict access to some content and services on our website.

We apologize for any inconvenience this may cause our users and appreciate your understanding and cooperation.

1. Content and Services That May Be Affected

- Various websites running on PHP (Technical Service Site, VIRTUAL SHOW ROOM, etc.)

2. Response and Downtime Period

We plan to resume service sequentially as soon as a restoration schedule is determined.
